Group Meeting Minutes

Module Title: BIS Design and Architecture

Group Number: C7

Meeting Number: Meeting Number One

Date: 14th of October 2025

Time: 11:31 AM to 01:15 PM

Location/Platform: IIT Study Area

Attendees: Vyishnavan, Senesh, Mevindi, Kavindi, Marisha

Absent Members: No One

Topics to be discussed

1. **Topic one –** Go through coursework specification
2. **Topic Two –** Start working on the Class diagram by identifying classes
3. **Topic Three –** Go through Lecture Materials

(These topics were planned before the first meeting)

Discussion Summary

Topic Discussed	Key Points / Decisions Made	Person Responsible	Person raised the topic
Go through coursework specification	Group reviewed the Foodiverse scenario and agreed to align individual diagrams with the scenario's business logic and requirements. All group members went through the coursework specification.	All member	Mrisha
Start working on the Class diagram by identifying classes	Class diagram which was created by us were completed	All member	Sensh

	based on the coursework specification scenario. Our group then decided to assign individual asynchronous work to refine and finalize the completed version of our class diagram, with the goal of making each diagram into a single common class diagram at the next meeting.		
Go through Lecture Materials	After we completed the class diagram identification, hand-drawn class diagram of our group using the coursework spec, with reference to the level 4 lecture materials plus level 5 lecture materials. And then after that the individual work was assigned to finalize complete class diagrams separately, which will be making into a common class diagram at the next meeting.	Mevindi	Kavindi

Action Items

Task	Assigned To	Status	Due Date
Create individual State Machine Diagrams	All Members	In progress	Before 21st October 2025
Complete a demo version of the class diagram.	All Members	Completed	14th October 2025
Write a 300-word explanation for the finalized State Machine Diagram	Vyish and Senesh	Pending	After 21st October 2025

Next Steps / Reminders

- **Main Point –** The group should finalize the class diagram and the class diagram description.
- **Point one –** All members must create their own State Machine Diagrams before next meeting.
- **Point two –** Together all members must finalize the state machine diagram by comparing all five diagrams. (From Five diagrams to One State Machine Diagram)
- **Point three –** Write a paragraph which contains no more than 300 words that explains the State Machine Diagram.

Next Meeting

Date & Time: 21st of October 2025 (11.00 AM)

Location / Platform: IIT Study Area

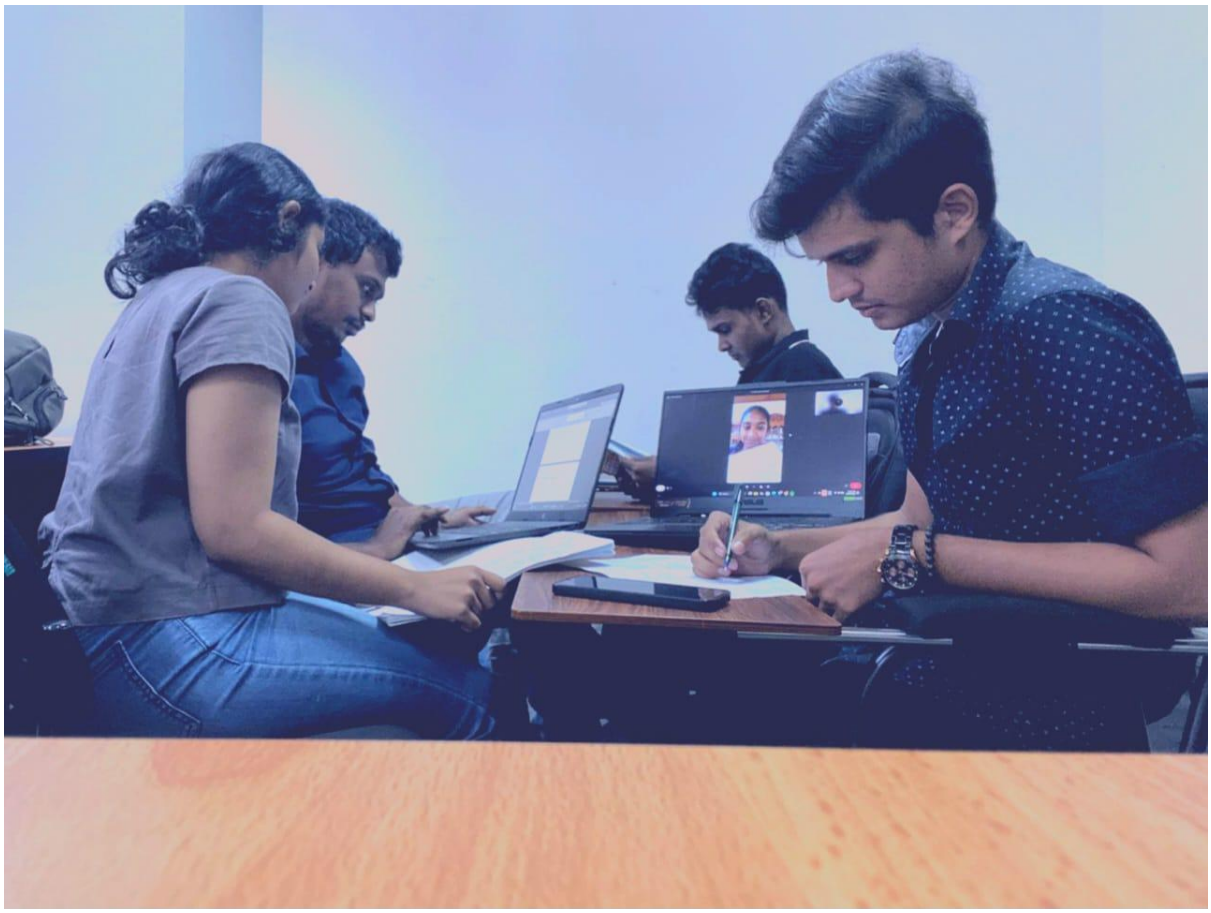
Proposed Agenda Items:

1. Create Demo Class Diagrams separately - Vyishnavan, Senesh, Mevindi, Kavindi, Mrisha.
2. Discuss the five class diagrams and draw one class diagram out of those five diagrams to get a better understanding.
3. Insert the class diagram and its explanation which contains 300 words to the group coursework report.

Brief Paragraph (200 words)

During the meeting one of our group projects, Foodiverse scenario members of our group collaboratively created an initial class diagram by identifying classes, attributes, and their operations drawn from the specification and lecture materials of level four and level five. Our group agreed that individual class diagrams are essential, so each member will produce their own individual versions; these diagrams then compare and merge into a single well defined class diagram at the next meeting. At the same time, all members of the group were tasked to develop state machine diagrams separately. These diagrams will be then reconciled into one well defined state machine diagram through our reviews. Responsibility for deliverables was distributed among group members; a demo version of the class diagram was completed within the meeting date. The planned next meeting will be held on 21st of October 2025 and during that meeting will focus on presenting each member's class diagrams, making common class diagrams, plus the 300-word state machine explanation into the coursework report.

Proof of the Group Meeting



Minute Taker: Mevindi Nethunima
